

KUSHAGRA JADIYA

Software Development Engineer | Backend & AI-Integrated Systems

+91 6262787980 | kjadiya2004@gmail.com | github.com/KushagraJadiya24 | linkedin.com/in/kushagra-jadiya

PROFESSIONAL SUMMARY

Software Development Engineer specializing in high-performance backend architectures, microservices, and AI systems. Proficient in Python, Java, FastAPI, Spring Boot, and Node.js with hands-on expertise building RAG pipelines, deploying Vector Databases, and serving Large Language Model (LLM) workflows. Experienced in REST API design, JWT/RBAC security, Docker containerization, and CI/CD deployment pipelines.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL, HTML/CSS

Backend Frameworks & APIs: FastAPI, Spring Boot, Node.js, Express.js, RESTful APIs, Microservices, JWT, RBAC

AI & LLM Engineering: Retrieval-Augmented Generation (RAG), Large Language Models (LLMs), Vector Embeddings, OpenAI, GeminiAPI

Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis

DevOps & Infrastructure: Docker, GitHub Actions (CI/CD), Git, Postman, Vercel

Frontend: React.js, Next.js, TailwindCSS

Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, System Design

WORK EXPERIENCE

Rashtriya Ispat Nigam Limited (Vizag Steel) — Project Trainee

Jun 2025 – Jul 2025

Technologies: Java, Spring Boot, React.js, REST APIs, MySQL, JWT

- Architected and deployed a corporate auction management portal, delivering 6 operational modules for enterprise clients within a 4-week timeline.
- Designed and deployed 12+ RESTful APIs for programmatic bidding and inventory tracking, incorporating centralized exception handling to reduce application runtime crashes by 40%.
- Configured stateless authentication using JWT and Role-Based Access Control (RBAC), enforcing granular permission isolation across 2 distinct user roles (Admin and Corporate Client).

KEY TECHNICAL PROJECTS

DevVault — Open-Source Secrets Management Platform [API Live Docs]

Spring Boot, Spring Security, PostgreSQL, Redis, Docker, GitHub Actions, Next.js

- Engineered a self-hosted secrets platform using AES-256-GCM encryption and Redis caching, cutting average secret retrieval latencies by 35%.
- Structured Role-Based Access Control, audit logging, and automated .env sync, reducing developer onboarding time by 96% (from ~15 minutes to under 30 seconds).
- Containerized services using Docker Compose and established CI/CD pipelines via GitHub Actions to streamline deployment on Railway and Vercel.

AthleticaAI — Voice-Driven AI Fitness Application [Live Demo]

Next.js, React, Google Gemini API, Vapi Voice AI, Clerk, Convex

- Pioneered a fitness application integrating Vapi Voice AI and Google Gemini API, processing conversational audio to generate personalized plans with 95%+ extraction accuracy.
- Orchestrated live state synchronization using Convex backend and Clerk authentication, delivering sub-100ms data updates across concurrent user sessions.

Lucidia — AI Powered Private Journal [Live Demo]

Node.js, Express.js, Together AI, MongoDB, Quill.js

- Constructed a collaborative editor integrating Together AI LLM endpoints to assist with dynamic document creation and editing.
- Implemented encrypted document storage for Quill.js-generated content, securing rich-text data at rest in MongoDB.

EDUCATION

Bharati Vidyapeeth College of Engineering, Pune

Jul 2023 – May 2027

Bachelor of Technology (B.Tech) in Computer Science & Engineering — CGPA: 9.06 / 10.0

ACHIEVEMENTS & CERTIFICATIONS

- National Finalist (Top 20 / 500+ Teams) — GFG Byte Quest Hackathon:** Selected among the top 4% of competing teams nationwide to architect and present a full-stack application prototype.
- Runner-Up (2nd Place) — Coding Crackers:** Outperformed department-wide participants in a competitive programming contest focused on Data Structures and Algorithms.
- NPTEL Elite Certification — Database Management Systems (DBMS) & C Programming**
